Lab Nº P3

Group Nº 18

Professor:

Teresa Romão

Month 12, 2022

Nº	Problem	Heuristic	Description	Severity	Solution	Screenshot
1	Inconsistency in the inventory tab	Consistency & Standards	After deleting a category in the “MyBrewstation”, the other categories don’t rearrange automatically leaving an empty space in the inventory	Minor	Automatically rearrange the inventory tab	 <p>Fig. 1</p>
2	Unused blank space	Aesthetic and Minimalist Design	On the “beers” tab, there is a lot of blank space between the top menu and the available filters that isn’t used	Cosmetic	Place the filters higher, closer to the top menu and place the filters closer to each other	 <p>Fig. 2</p>
3	Wrong input	Error prevention	When ordering beers on “Beers” or when adding inventory on “MyBrewstation” the number of beers could be a random sequence of letters	Catastrophic	Add a dropdown with numbers or make it so letters can’t be used	 <p>Fig. 3</p>  <p>Fig. 4</p>
4	Lack of feedback	User control & Freedom	After signing up the user stays on the same page without any feedback	Major	After the user clicks on “continue” make it so he’s redirected to the main page or at least a pop-up appears saying the sign-up was successful	 <p>Fig. 5</p>

5	Lengthy date input	Flexibility & Efficiency of use	When creating an event the user needs to put the date by hand	Minor	Add a regular date picker with html <code><input type="date"></code>	<div> Add an event <div> Name <input type="text"/> </div> <div> Description <input type="text"/> </div> <div> Date <input type="text"/> </div> </div>
